

Tanya Willis
Garden Design

Synopsis:

Our planned first phase for 'A Place of Peace' involves developing two areas of the St Mary Magdalen churchyard (indicated in black in the map below): in the western corner (the existing 'Memorial Garden') by Brinsmead Rd; and just South of the Church next to the Saffron Brook fence ('Brookside Garden').

The new designs for the churchyard will enhance the area for the local community and wildlife, with peaceful seating areas and sculptural focal points for contemplation and relaxation. Accessible pathways through a range of soft planting will help to connect to nature through seasonal interest, a variety of flower shapes and forms for pollinators and new habitats for birds and small mammals.

The designs will use local and reclaimed materials and incorporate sustainable practices for the ongoing care and maintenance through composting, directed flow of rainwater and the range of plants sequestering carbon dioxide.
